1. This communication is in response to applicant's Amendment and Terminal disclaimer filed 19 April 2004.

***Reasons for Allowance***

2. The following is an Examiner's statement of reasons for the indication of allowable subject matter:

The closest prior art of record shows:

- (1) an expert and data base system and method for communications network (Galis et al US 5,175,800);
- (2) one-time log-on means and methods for distributed computing systems (Kung, US 5,241,594);
- (3) an apparatus and method for software system management (Phipps et al (US 5,640,567);
- (4) a method and device for obtaining a value of a referred to variable defined in a source program having a specific variable name (Kitadate, US 5,721,924);
- (5) an information terminal having reconfigurable memory (Pinder et al US 5,742,677);
- (6) a system for backing up files from disk volumes on multiple nodes of a computer network (Whiting et al US 5,778,395);
- (7) a method and system for escrowed backup of hotelled world wide web sites (Nielsen US 5,812,398);

Art Unit: 3621

(8) a method and apparatus for moving large numbers of data files between computer systems using import and export processes employing a directory of file handles (Anderson et al, US 5,819,296);

(9) dynamic configuration of a secure processing unit for operations in various environments (Le et al US 5,883,956);

(10) a processing apparatus for scrambled data stream - determines at primary software module resident in CPU, whether data needs to be protected during subsequent transmission from computer system's CPU (EP 0887723-A2);

(11) Stevens, W. Richard, Unix Network Programming (Prentice-Hall, 1990), pp. 24-25;

(12) Schneier, Bruce, Applied Cryptography, Second Edition (Wiley, 1996), pp. 30-31, 265-269, 435-436;

(13) Wright, Gary R., TCP/IP Illustrated, vol. 2 (Addison-Wesley, 1995), pp. 64-65.

3. Applicants' set of claims consists of claims 8-17.

4. Independent claim 8 is directed at a method for the exportation of configuration data. This claim presents the uniquely distinct feature of allowing the resultant text file to be selectively edited. Because nothing in the prior art appears to teach or suggest the latter feature, independent claim 8 is deemed allowable.

5. Independent claim 9 is directed at a method for the importation of configuration data. This claim presents the uniquely distinct feature of allowing the resultant text file

to be selectively edited. Because nothing in the prior art appears to teach or suggest the latter feature, independent claim 9 is deemed allowable.

6. Independent claim 10 is directed at a method for the exportation of configuration data. This claim presents the uniquely distinct feature of allowing the resultant text file to be selectively edited. Because nothing in the prior art appears to teach or suggest the latter feature, independent claim 10 is deemed allowable.

7. Independent claim 11 is directed at a method for the importation of configuration data. This claim presents the uniquely distinct feature of allowing the resultant text file to be selectively edited. Because nothing in the prior art appears to teach or suggest the latter feature, independent claim 11 is deemed allowable.

8. Independent claim 12 is directed at a method for the importation/exportation of configuration data. This claim presents the uniquely distinct feature of allowing the resultant text file to be selectively edited. Because nothing in the prior art appears to teach or suggest the latter feature, independent claim 12 is deemed allowable.

9. Independent claim 13 is directed at a computer program product for the exportation of configuration data. This claim presents the uniquely distinct feature of allowing the resultant text file to be selectively edited. Because nothing in the prior art appears to teach or suggest the latter feature, independent claim 13 is deemed allowable.

10. Independent claim 14 is directed at a computer program product for the importation of configuration data. This claim presents the uniquely distinct feature of allowing the resultant text file to be selectively edited. Because nothing in the prior art

Art Unit: 3621

appears to teach or suggest the latter feature, independent claim 14 is deemed allowable.

11. Independent claim 15 is directed at a computer program product for the exportation of configuration data by a processor. This claim presents the uniquely distinct feature of allowing the resultant text file to be selectively edited. Because nothing in the prior art appears to teach or suggest the latter feature, independent claim 15 is deemed allowable.

12. Independent claim 16 is directed at a computer program product for the exportation of configuration data by a processor. This claim presents the uniquely distinct feature of allowing the resultant text file to be selectively edited. Because nothing in the prior art appears to teach or suggest the latter feature, independent claim 16 is deemed allowable.

13. Independent claim 16 is directed at a computer program product for the importation/exportation of configuration data by a processor. This claim presents the uniquely distinct feature of allowing the resultant text file to be selectively edited. Because nothing in the prior art appears to teach or suggest the latter feature, independent claim 16 is deemed allowable.

14. Any comments considered necessary by Applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
